Certifications

- Certified in Human-Computer Interfaces by IIT Guw
- Completed Java Certification via IIT Bombay

Hobbies/Interests

- Video Editing,Open Source
- Problem Solving
- Graphic Designing
- Application Development

Languages

- Tamil
- English
- Hindi

Summary

Ambitious 3rd-year B.Tech student in Artificial Intelligence and Data Science at Mepco Schlenk Engineering College. Possesses a strong academic foundation (8.3 CGPA) with practical knowledge in machine learning algorithms, data analysis, and modern developer AI tools. Motivated Java and Python Developer with hands-on project experience in application development, automation, and data analysis.

Education

Degree: B.Tech AIDS	Marks/CGPA: 8.3
Institution/University: Mepco Schlenk Engineering College	Year of Passing: 2028
12th or Equivalent: 12th	Marks/CGPA: 83.8
College/Board: State Board	Year of Passing: 2024
10th: SSLC	Marks/CGPA: 84.8
School/Board: State Board	Year of Passing: 2022

Skills

Technical Skills: Programming Languages: Python, Java, C, C++, SQL.Core Concepts: Data Structures, Algorithms, Object-Oriented Programming (OOPS), Database Management Systems

Soft Skills: Core Competencies: Problem-solving, Analytical Thinking, Team Collaboration, Time Management, Adaptability, Effective Communication.

Tools: Libraries & Frameworks: Pandas, NumPy, Scikit-Learn, Matplotlib, Seaborn.Developer Tools: Git, GitHub, VS Code, Jupyter Notebook, Google Colab.Databases: MySQL,

Project

Project Title

Smart Food Rescue Network (Java Mini Project)

Tools/Tech

1 Java Swing (GUI) 2 Threads (Background processing) 3 Collections (ArrayList, HashMap, PriorityQueue)

Details

The Smart Food Rescue Network is a system designed to reduce food waste and help redistribute excess food to people in need. It connects food donors such as restaurants with receivers like NGOs using a smart matching mechanism. This project demonstrates how technology can be used to solve real-world

Project Title

Smart Online Voting Registration System

Tools/Tech

Programming Language: PythonDatabase Management System: MySQLDatabase Connector: mysql-connector-python or PyMySQLFrameworkLibrary: Django Flask (for web apps)

Details

The Smart Online Voting Registration System is a secure web-based application designed to digitalize and streamline the voter registration and verification process. Developed using Python for backend logic and MySQL for robust database storage, the system ensures data accuracy, eliminates error.

Internship/Work Experience

Organisation: Ucanly InfoTech

Duration: 2 months

Role: Full Stack Web Development Full Stack Development – Edge

Key Responsibilities/Achievements

- Built responsive full-stack web applications with advanced AI integrations.
- Partnered with virtual teams to deliver key software project milestones.
- Implemented user authentication protocols to secure confidential registration.
